

VortexJHB VIP Info

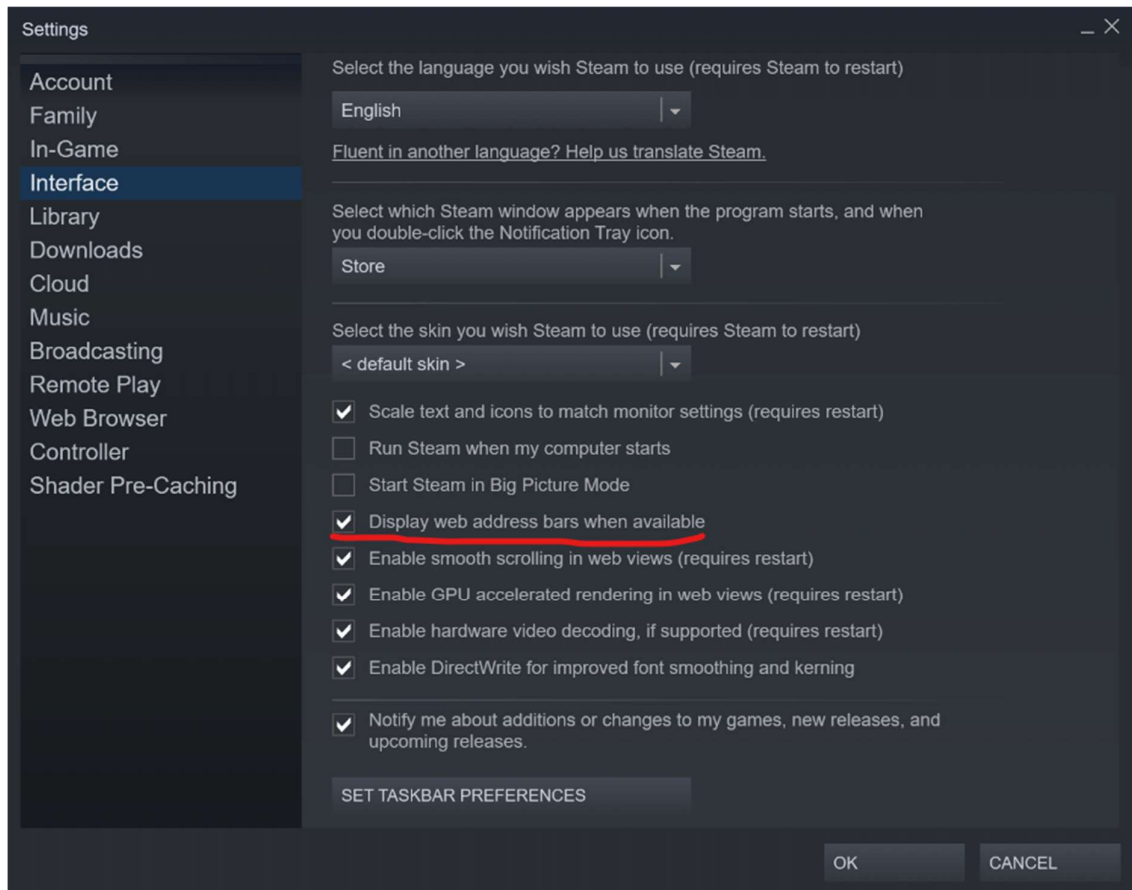

First off, thanks for supporting us! It really means a lot. We've done our best to make it worth buying VIP, but if you have any suggestions or complaints, please don't hesitate to DM us.

Here follow the benefits of VIP and how to use them:

- Choose your own chat prefix and colour. DM me (SCMPID#0001) with your preference and I'll sort it out.
- You can use the /skin command to skin any item you like. Just drag your item into the box on the right and select a skin that you like. We've found that this is especially popular with our Role-players.
- If you want a specific skin, you can use the /skinid command. Find the ID of the skin in the Steam Workshop.

You may have to enable a setting to see the URL at the top.

If items show a blue circle instead of a skin, it's not an issue with the server. It's either a local issue or an Image Library issue. Please be patient when this happens.

You may also see a blue phantom when placing skinned items. These phantoms disappear when you relog.

As a VIP, you also have the ability to skip the queue, when there is one.

Thank you once again for supporting us, and enjoy the server! <3
